Supporting Answers

1. Find a current computer book or dictionary with the definitions. Use correct terminology but find illustrations to help children understand the concepts.
 - a. Documents and books— Word processors are primarily designed to create letters, reports, and documents. Desktop publishing programs help combine graphics with text.
 - b. Databases—Programs that allow you to manipulate, store, record, and retrieve information from a collection of related files: like addresses, memberships, or store inventories.
 - c. Calculations—Spreadsheets are made for math calculations for accounting or record- keeping purposes.
 - d. Communications—Cover the Internet, E-mail, and the world wide web. Talk about the need to use discipline to bypass the bad information and how to use the good information.
 - e. Research—Current resource materials for research are available in minutes through the Internet services. You can also use material from CD-ROMs or other resource software. Computerized searches are fast, and sometimes give you more ideas. One such CD is the E. G. White Library or an encyclopedia CD.
 - f. Games—There will always be games. Computer games can be good if they challenge your mind and mental skills as well as your dexterity. Put it to the test of Philippians 4:8. All of our computer work should meet that standard.
